

Respond Consult

Enhancing patient care

**specialists in stoma
and continence care**

an eakin company 

Respond Consult

a next generation patient management system

Consult has been designed to help improve communications in the hospital and with the community Stoma Care Nurses. It gives you real time access to patient information with full records and notes available at the touch of a button.

Consult can be used for the initial consultation and throughout the patient journey. It can be used on your desktop and as an iPad app when required.

key benefits
