making life better

support for you

Innovative support wear

HiLINE garments are designed to provide abdominal support following bowel surgery and can be used for hernia support or as a preventative measure during physical activity.

A HiLINE garment provides comfort and discretion under clothing, whilst maintaining a high level of support.

HiLINE garments can be worn as they are or we can alter the garment to make a hole over the stoma if required.

HiLINE, HiLINE Activ and HiLINE EZ-Wrap ranges provide a comprehensive solution to any situation that requires the need to use a support wear product.

Why choose anything else when you can have a HiLINE product?

The HiLINE, HiLINE Activ and HiLINE EZ-Wrap range

The HiLINE, HiLINE Activ and HiLINE EZ-Wrap Support wear range are suitable for conditions such as:

- Ileostomy
- Post surgery
- Colostomy
- Hernia
- Urostomy
- Incontinence

A photograph of a man with a beard and glasses, wearing a dark green long-sleeved shirt, lifting a young girl in a purple floral dress. Both are smiling and looking at each other. The background is a bright, modern kitchen with white cabinets and a white lamp.

respond.co.uk

The CoolCOMFORT light support underwear is suitable for everyday use replacing regular underwear and can be worn under a waistband for extra support. CoolCOMFORT are very comfortable to wear and provide light support without being restrictive and will not affect a stoma pouch from functioning. Ideal for those requiring gentle support following surgery or for everyday use.

A young woman with long, dark, wavy hair is smiling broadly, looking towards the camera. She is wearing a red and blue plaid shirt under a grey sweater and a gold chain necklace. To her left, a young man with a beard and a striped shirt is looking towards her. The background is a blurred social gathering with other people.

HiLINE support wear range offers a complete range of innovative support wear products to suit all your needs.

unisex light control prescription support garments

- High waisted
- Seam free
- 100% stretch
- MRSA resistant

CoolCOMFORT unisex garments are designed to provide light support following surgery and are available in white, black or beige colour choices.

CoolCOMFORT are the only garments currently available on prescription which are MRSA-resistant - up to 50 washes at 40 degrees, and hydrophilic, which means they wipe away sweat and moisture, keeping the skin dry and the wearer comfortable throughout the day.

"In all the years I have had a colostomy, I have never had a garment that doesn't put pressure on my stoma, yet supports me totally, and feels so light next to my body as if the garment is not there. They are brilliant to wear."
Mrs C. P. (London)

"CoolCOMFORT make a vast difference to my life. They hold the bag securely and make me feel more comfortable because I feel safe."
Mr R. A. (Stoke on Trent)

- Choice of boxer, brief or belt
- Breathable two-way stretch fabric
- Underwear has a high waistband to cover a stoma pouch and comes with a 180° stretch
- Garments are soft and lightweight
- Hydrophilic – wipes away sweat and moisture
- Ribbed panel for smoother body profile
- Seam-free – no rubbing/irritation
- Provides comfort, security and peace of mind
- Ideal for daily activities and sports
- Can be worn day and night
- Improves pouch adhesion
- Does not affect pouch functionality

Boxer

Brief

Support belt

lightweight unisex support belts

This lightweight belt has a strong cotton front, lined with stain resistant soft peached fabric and has been designed to support the areas that need it most. The back is made up of cushioned elastic, which helps to keep the skin cool and may help with lower back support. These garments are soft on the skin and comfortable to wear, whilst providing solid support during physical activity. The Res 4 belts have an extra 8cms of depth compared to the Res 3. Those with a larger hernia or a longer body will benefit from the additional depth that this style provides.

- Provides medium support to protect an existing hernia and preventative support to reduce the risk of developing a hernia
- Designed with a cotton front support section and lined with a stain resistant very soft peached fabric
- The back is made from cushioned elastic to keep the skin cool
- Support where it is needed most
- Garments have an antibacterial and antimicrobial coating
- Provides solid support yet the belt is very lightweight
- Adjustable Velcro® Brand fastening
- Available in sizes S-XXL

- + ANTIMICROBIAL COATING

Please specify choice of colour and size of garment when ordering.

A medium level support wear garment from HiLINE is ideal for everyday use including sport, work and leisure activities. Supportive yet comfortable to wear, whilst providing medium level support to relieve hernia symptoms, protect hernia repairs and help to reduce the risk of developing a hernia.

HiLine activ support wear

- Designed to provide medium level hernia support or prophylactic support
- Completely hides the stoma appliance
- Provides additional support for the weight of the stoma pouch itself
- Front zip allows ease of emptying and draining of appliance without the need to remove the belt
- Inner lining is made from leak proof material so offers security and peace of mind from embarrassing accidents and leaks
- Ideal for those who are more active through sports, swimming, work and leisure activities
- Comfortable to wear, supportive and discreet
- Soft and flexible material so does not restrict pouch functionality
- Provides the wearer with confidence and discretion to lead a normal active lifestyle

medium control ostomy pantie brief

With the same comfortable style and all the features of the ostomy pantie brief, this garment gives medium support whilst still retaining the wearer's femininity. The front lining is created from a stain resistant, cotton/nylon mix open weave lace front. Available in black or white colour choices. The cross over waist band gives extra comfort when sitting and helps prevent the garment from rolling over at the top. These garments are designed with a classic leg fitting.

- Provides medium support to relieve hernia symptoms, protects hernia repairs and helps prevent any reoccurrence
- Improved appearance and promotes security, confidence and peace of mind
- Made from high quality material with a beautiful lace front, it is designed to be worn like standard underwear but with the added support benefits
- Garments are supportive yet comfortable and will assist in bag adherence
- Cross over waist band gives extra comfort and prevents the garment from rolling
- Antimicrobial and antibacterial coating to control the growth of odour-causing bacteria in the material

respond.co.uk

Please specify choice of colour and size of garment when ordering.

Designed for those who need a little extra support than they would get from a medium level HiLINE support wear garment. Ideal for everyday use including leisure activities, sport and work as well as exercising and lifting. Providing relief for hernia symptoms, whilst protecting hernia repairs and will help to reduce the risk of developing a hernia without being restrictive.

Children's sizes available.

A minimum measurement of 24 inches is required *around the stoma.*

hernia support belt

The HiLINE EZ-Wrap unisex hernia support belt is a brand new design which provides medium/firm level hernia support or prophylactic support and is also ideal for those with dexterity issues or who normally struggle to fasten a standard Velcro® Brand support belt.

The EZ-Wrap belt is designed with a side zip pocket and additional lugs for ease of application and an anti-roll grip effect waistband.

White, black and beige - available with a hole option

- Medium/Firm Support Wear
- Choice of 3 depths and 3 colours
- Anti-roll grip effect waistband
- Zip pocket for ease of application
- Additional lugs for ease of application
- Reinforced support around stoma
- Zip pocket can also be used to carry spare pouch/wipes or for gym card/locker key for active wearers
- Material is supportive yet soft and flexible

When ordering please remember to specify colour and size required. If you need a hole in your belt you must supply your pouch code number (baseplate code also required if using a 2 piece system).

seamless 2 way stretch unisex colostomy belt

Made from a seamless strong knitted fabric with two way stretch, this support belt is ideal for people who have dexterity issues or difficulty with fastenings. The seamless design gives better conformity and is less obtrusive under close fitting clothing. The low fabric weight is a breakthrough in technology for the level of compression achieved. Very lightweight and exceptionally strong, yet comfortable to wear, it is also suitable for night time use. The Res 8 option provides the same style details, features and fabric as the Res 7 above, but has an extra 7cms in depth. If you need a deeper garment you must order this item with the correct code Res 8 on your prescription.

- Provides medium to firm support to protect an existing hernia or preventative support to reduce the risk of developing a hernia
- Made from a seamless strong knitted fabric
- Exceptionally strong yet lightweight material
Material has two way stretch so supports without restricting pouch functionality whilst being very comfortable to wear
- No Velcro® Brand fastening so more discreet under clothing
- Choice of colours and 2 depth options with 26cm depth or wider 33cm depth option

ostomy pantie brief

Manufactured in the highest quality satin or cotton damask, this garment gives a medium to firm support whilst retaining the wearers femininity. The front lining is created from a satin resistant, soft peached cotton/polyester mix. The gusset is lined with cotton jersey for comfort. Available in black or white colour choices. The cross over waist band gives extra comfort when sitting and helps prevent the garment from rolling over at the top. These garments are designed with a high leg fitting.

- Provides medium to firm support to relieve hernia symptoms, protects hernia repairs and helps prevent any recurrence
- Made from high quality material and designed to be worn like standard underwear but with the added support benefits
- Cross over waist band gives extra comfort and prevents garment from rolling
- Improves appearance and promotes security, confidence and peace of mind
- Garments are supportive yet comfortable and will assist in bag adherence
- Antimicrobial and antibacterial coating to control the growth of odour-causing bacteria in the material

Designed for those with larger hernias who require stronger support or for those who are participating in more strenuous activities and require something more supportive as a preventative measure. Ideal for everyday use including leisure and work activities.

breathable stretch unisex ostomy belt

This stretch elastic fabric constructed of a cotton/nylon/ rubber mix will give firm support to a hernia and the lower back. The open weave allows the skin to breathe reducing heat and improving comfort levels, therefore proving vastly beneficial for stoma pouch users and an ideal choice for all ostomates. The breathable belt comes in a choice of 3 depths, each one provides the same style details, features and fabrics but the choice of depths allows those who prefer a narrower fit or who have a longer body, the option of a belt depth to suit all body requirements.

- Provides firm support to protect an existing hernia or preventative support to reduce the risk of developing a hernia
- Designed with an elastic stretch fabric
- The open weave fabric allows the skin to breathe
- Garments have an antibacterial and antimicrobial coating
- Provides solid support with the added comfort and breathability benefits
- Adjustable Velcro® Brand fastening, 3 depth options available with 13.5cm, 18cm or 21cm depth options
- Available in sizes S-XXL

ostoshield

Ostoshield is a lightweight moulded shield, which has been designed to help protect the stoma from direct contact. It has been shaped to allow the stoma pouch to function during wear and can be worn discreetly under any type of clothing. Ostoshield is held in place by a detachable, strong, adjustable elastic belt (ordered separately).

Ostoshield offers security and protection during sporting activities, gardening, whilst at work and also to prevent car seat belts from rubbing against the stoma.

Res50 Ostoshield and Res40/45 Belt

- Protects the stoma from direct contact
- One size shield fits all
- Ideal for sport, work, gardening and whilst driving
- Lightweight
- Does not affect pouch functionality
- Discreet to wear
- Adjustable belt
- Belt is available in sizes S/M or L/XL
- Quick and easy to put on and take off
- Specially designed for ostomates
